Research Advisory Committee

The Research Advisory Committee (RAC) is the apex body of the Crossian Centre for Research and Development (CCRD). It plays a pivotal role in guiding and supporting the research endeavors by providing valuable insights, expert advice and strategic direction. Its primary function is to ensure that research projects under Crossian Research Seed Money Scheme (CRSMS) align with institutional goals, maintain academic rigor and adhere to ethical standards. The committee is responsible for scrutinising the Crossian Research Seed Money project proposals and finalising the selection list. Through periodic reviews and discussions, the RAC offers constructive feedback, fosters multidisciplinary collaboration and facilitates access to resources, enabling the faculty members and scholars to make significant contributions to their fields. The committee also promotes innovation and research excellence by providing guidance as needed.

The Members of the Research Advisory Committee
